

Monitoring and Reporting on Microsoft Azure Resources

Tim Warner

AUTHOR EVANGELIST, PLURALSIGHT

@TechTrainerTim TechTrainerTim.com

Overview

Implement Azure Monitor log search

- Query and analyze logs
- Save KQL queries to the portal Dashboard
- Interpret graphical output

Monitor Application Insights

Configure Azure Monitor alerts and action groups

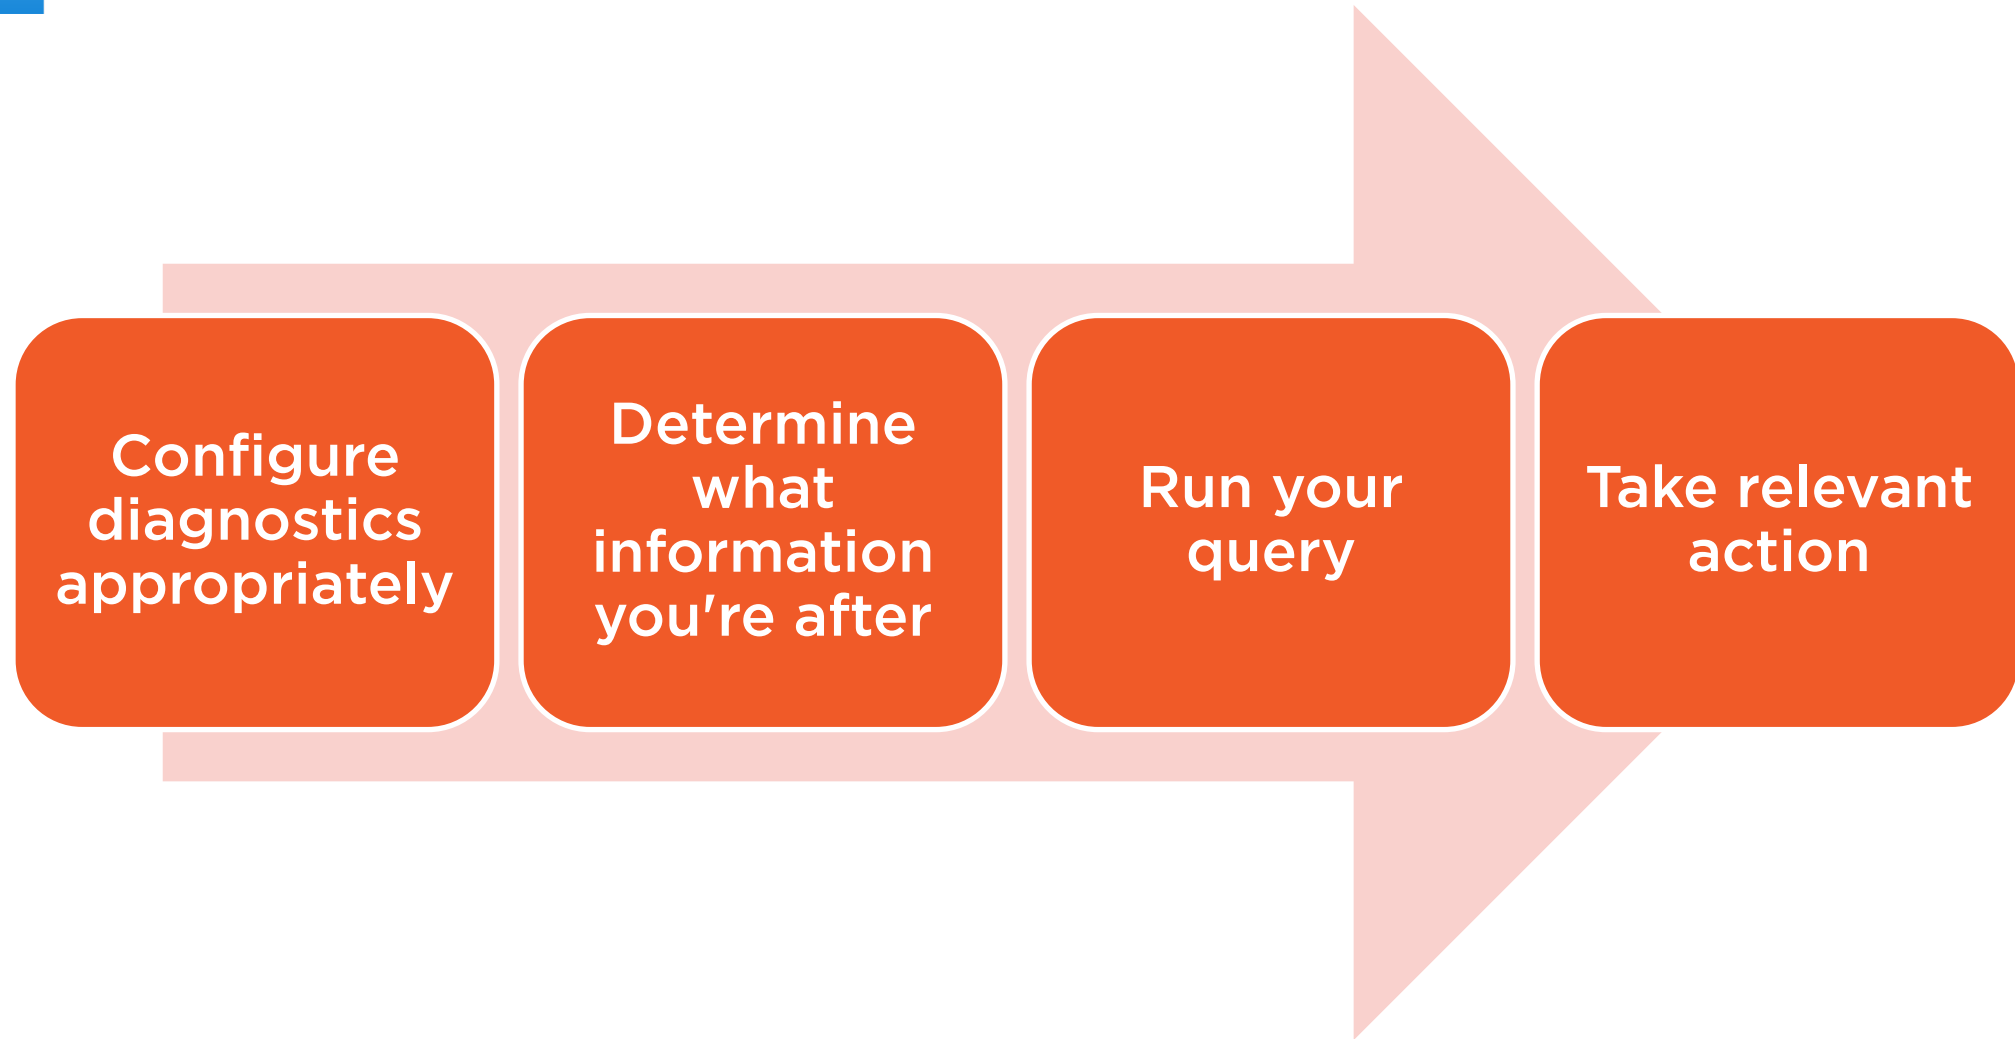

Log Search

Log Search Workflow

Application Insights

Application Insights Components

Smart detection

- Live anomaly detection

Application map

- Visualize dependencies

Profiles

- Execution data for web requests

Usage analysis

- User segmentation and retention

Live metrics

- Stream to dashboards

Demo

1

Log search

- Graphs
- Dashboard pinning

Application Insights

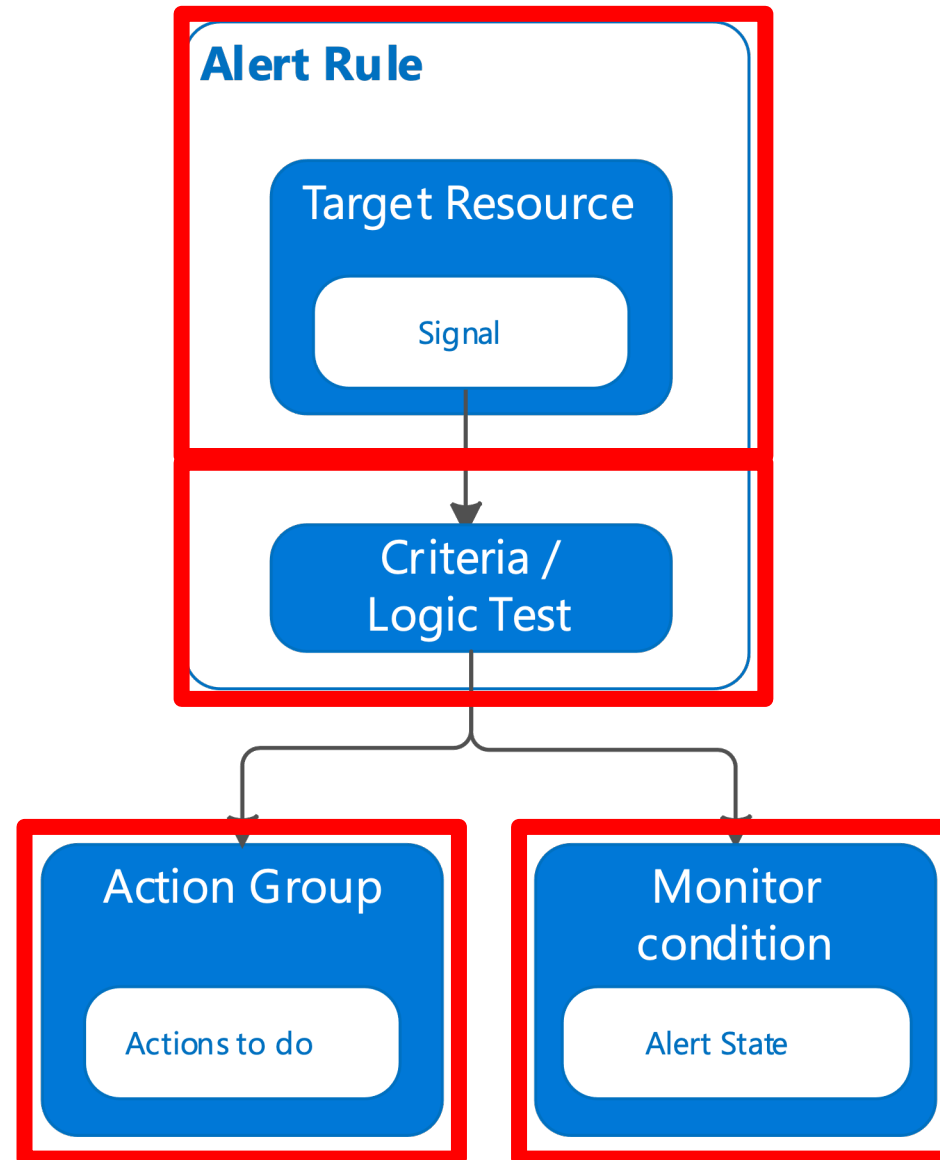

Alerts and Action Groups

Azure Monitor Alert Workflow

Demo

2

Alerts and action groups

Summary

Azure monitoring trends:

- Azure Monitor
- Workbooks
- Insights
- Log search

Thanks!
